### LonMark International Empowers Intelligent Control Networking Solutions: New Technology Advancements for Building Automation and Smart Cities

09:30  
–  
11:00

本论坛将以四个新科技以 **LonMark** 发展为主题，并且以楼宇自动化和智慧城市的应用，包括智能路灯和其他案例作为讨论点。

- LonWorks 高速 / 高性能电源线通讯技术。
- LonWorks 高性能无线电通讯技术。
- LonMark 互联网通讯标准定义和支援 IPV6。
- LonMark 网络服务企业标准和支援跨平台的应用。

关展辉 先生, LonMark 国际协会 中国代表

**This workshop will provide an overview of 4 new technologies in development at LonMark, cases for building automation, smart city applications including streetlighting, and others will be discussed.**

- New LonWorks High Speed/High Performance Power Line Communication Channel
- New Hi Performance RF Communication Channel for LonWorks
- New LonMark IP Channel Definition Standard with Support for IPV6
- New LonMark Web Services Standard for Enterprise and Cross Platform Application Support

## 蓝牙实现智能楼宇自动化

### Bluetooth — Making Intelligent Building Automation at Scale a Reality

随着 Bluetooth® 蓝牙 mesh 的发布以及蓝牙广播的最新进展，大规模智能楼宇自动化成为现实，即使在对于稳定和安全性要求最高的商业和工业环境中也是如此。随着整体楼宇覆盖变为现实，蓝牙正在通过实现室内定位和基于位置的服务扩展智能楼宇的定义。这些服务的重点在于提升访客体验，提高建筑使用者的生产力，优化空间利用率。通过这个论坛，我们将带您从市场及技术的角度来看蓝牙如何实现智能楼宇自动化，并且介绍如何加入 SIG 及参与到蓝牙规格的制订。

主办单位：  
蓝牙技术联盟

The release of Bluetooth® mesh and recent advancements in Bluetooth broadcasting make intelligent building automation at scale a reality, even in commercial and industrial environments where reliability and security requirements are highest. With whole-building coverage now a possibility, Bluetooth is expanding the definition of the smart building by enabling indoor positioning and location services that focus on enhancing the visitor experience, increasing occupant productivity, and optimizing space utilization. This forum will give you an update on how Bluetooth enables Smart building from both market and technology perspectives, as well as how you can join the Bluetooth SIG and get involved in Bluetooth specification.

## 物联网时代智慧停车的应用与未来

## IoT — Enlighten Smart Parking in the New Age

随着停车需求的日益增加，如何解决停车难问题已成为重要社会民生问题。在市场需求及物联网技术不断成熟的推动下，智慧停车应运而生。本次论坛意在通过邀请政府、城市规划者、经营管理者、用户、企业等停车各领域代表围绕“什么是智慧停车”为话题各抒观点，并对智慧停车的诉求及应用展开讨论实现教育引导行业及市场的作用。促进在物联网时代背景下智慧停车能够早日落地并推广。

With the increasing demand of parking, parking shortages have become a significant issue across the country. Driven by the market demand and the maturing IoT technology, smart parking arises as the time requires. This forum aims at sharing different points of views on “What is smart parking” and bringing the appeal and application of smart parking up for discussion by inviting representatives from fields of the Government, urbanists, managers, users and companies, finally educating the industry and market. It will contribute to the early landing and promotion of smart parking in the IoT age.

## 从“智能建筑”到“感知建筑”：EnOcean 物联网解决方案

## From Smart to Cognitive Buildings: EnOcean IoT Solutions

普通人一天 90%的时间都在室内，并且建筑的日常运行成本占其生命周期总成本的 70%。然而，在建筑的使用上，我们并没有做到尽可能的高效。统计数据显示，商用建筑只有 66%的面积真正被使用；另外，建筑用电占全社会用电总量的 42%，但其中 50%的电力都被浪费了。此次 EnOcean 论坛，将为楼宇领域的专业人士介绍基于 EnOcean 能量采集无线标准的解决方案，如何在以最低的规划安装成本，让“智能建筑”及“感知建筑”更加舒适、智能，同时降低运行能耗与成本。

主办单位：  
EnOcean 联盟

Despite the growing demands for intelligent buildings, many are not build nor used as efficiently as they might, which is important considering we spend 90% of our time indoors, and operations account for 70% of a building's total cost over its life. Moreover, only 66% of commercial space is actually being used, and while buildings account for 42% of all energy use, up to 50% of that energy is wasted. To enhance the energy performance of buildings, at EnOcean Alliance Forum, building professionals will learn more about solutions for smart and cognitive buildings on the EnOcean self-powered wireless standard IEC/ISO 14543-3-1X.

## SISS 上海国际智能工业解决方案研讨会

SISS – Smart Industry Solutions Shanghai

上海智能工业解决方案研讨会 (SISS) 以“智能工业解决方案”为主题, 秉承母展德国 SPS IPC Drives 品牌展及旗下首个中国工业自动化展 – SIAF 广州国际工业自动化技术及装备展览会的成功经验, 聚焦以物联网连接实体与虚拟生产的崭新智能制造的工业模式、多种尖端智能工业系统、科技以及解决方案, 让企业展示最新智能化方案成果, 推进智能化制造革命。

主办单位:  
广州光亚法兰克福展览有限公司

From smart factories to automotive and intralogistics, our elite conference program - Smart Industry Solutions Shanghai (SISS) - touches every main facet of Application areas of Internet of Things.

Inspired by SPS IPC Drives in Nuremburg, Germany and its first sister event in China, SIAF – SPS Industrial Automation Fair Guangzhou, Smart Industry Solution Shanghai highlights the revolutionary method of manufacturing that utilises Internet of Things (IoT) to connect real and virtual worlds of production. Cutting-edge intelligent industrial automation systems, technologies and solutions will be on offer, making the show an ideal trading and knowledge sharing platform for your company to showcase innovative smart solutions and help manufacturers today prepare for high-tech productions in the future.

Organiser:  
Guangzhou Guangya Messe Frankfurt Co., Ltd.

**13:30 – 16:00** 每年, 上海智能解决方案研讨会如期汇聚来自工业 4.0 各个板块的行业专家, 包括综合性企业以及中小型专业企业的终端用户和解决方案提供者、决策者和工程师。

过去三届研讨会, 上海智能解决方案研讨会组织了逾 50 场以 IoT 技术为主的创新解决方案技术及应用研讨会, 旨在传递更多关于未来工厂的关键信息。之所以以“智能制造”为主题出发, 是因为相比其他行业, 制造业最先定义且实现了工业物联网从战略上以及实操上的意义。这个行业也是最早对此类技术投资最大的群体之一, 因此, 至于其他行业, 制造者及生产者们在 IoT 工业物联网技术的价值实现上是具示范启发作用的。

2018 年, 研讨会将在工业互联网大背景下, 跟随数字化的脚步, 从应用于智能制造乃至跨多领域应用的大数据分析、IT 和 OT 的融合、数字双胞胎、人工智能、甚至 3D 打印及机器人, 以及数字化的各个元素等进行更深入探讨。

来自于自动化行业的专家, 如罗克韦尔、倍加福、得利捷、堪泰等, 将介绍在面对制造业未来发展面临的机会与挑战时, 如何用互联企业解决方案来实现智能制造, 从而提高企业应对市场变化的能力和总体竞争力。就如何从现在开始逐步实施智能制造做了介绍。

Each year the Smart Industry Solutions seminar program includes a wide spectrum of professionals from all corner of Industry 4.0. End-users and solution providers, executives and engineers from enterprises ranging from SME to global conglomerates.

In past 3 years, SISS seminars have organized more than 50 valuable presentations with IoT-featured solutions, delivered the information about core elements of the fabled “Factory of the Future”. More than any other sectors, the manufacturing industry identifies the potential value from IIoT predictive maintenance from both strategic and operational perspectives. The significant investments in R&D touch all aspects of the manufacturing process. The manufacturers and producers that demonstrated a willingness to be early adopters of nascent technologies are expected to be the first to benefit financially from advances in IoT technologies. So the manufacturing industry is always the inspiring and reference to the players of other industries.

In 2018, SISS goes deep into the power of industrial network – following the pace of digitalization - big data analytics, IT/OT convergence, Digital Twin, Artificial Intelligence, even 3D printing and robotics. Elements of digitalization (or digital transformation or Industry 4.0) are applicable across industry and manufacturing.

To introduce automation’s connected enterprise solution for smart manufacturing. Describe how to deploy The Connected Enterprise to help manufacturer shorten time to market, improve productivities, reduce risk and enhance overall competitiveness. The speakers are mainly come from the automation industry, such as, Rockwell, Pepperl+Fuchs, Datalogic and Contrinex etc.

语言 & 费用: 普通话 (不设同传)。与会费用全免。
